The purpose of these websites and blogs is to present an informal setting for people to enjoy books without feeling the pressure of making a purchase. Recent research investigations have demonstrated the complexity of land-atmosphere processes, making it necessary for the next generation of scientists to have a multidisciplinary background. In 2001 Dr. Shuttleworth was awarded the AGU Hydrology Prize for outstanding contributions to the science of hydrology, and in 2006 IAHS, UNESCO and WMO jointly awarded him the prestigious International Hydrology Prize. Some present notes, reflections, and reviews that their readers can comment on, discuss, or reflect on. Both hydrologists and meteorologists need to speak a common scientific language, and this has given rise to the new scientific discipline of hydrometeorology, which deals with the transfer of water and energy across the land/atmosphere interface. Fortunately, the new book by James Shuttleworth, *Terrestrial Hydrometeorology*, addresses this issue by combining both hydrology and meteorology. Some of these channels follow a specific niche topic while others are about books in general. Research or Special Interest Book Summary Websites For those who need a summary of a book that covers a research or special interest topic, there are dozens of book summary websites focusing specifically on this. In 1993 he joined the University of Arizona where he is Regents Professor in both the Department of Hydrology and Water Resources and the Atmospheric Sciences Department. Follow these guidelines to learn where to find book summaries online. Websites and Blogs Many websites and blogs offer summaries of chapters in books for free to their readers. Jim joined the Department of Hydrology & Water Resources in 1993, with a joint appointment in Atmospheric Sciences. The UA recognized Jim's immense contributions in 2009, by awarding him title of Regents Professor. There is a video made by UArizona about Jim at the time he received the award. In conclusion, we are reminded of the following advice given by Jim to young scientists in his acceptance of the International Hydrology Prize. He said: "First, in one's progress through life there are basically two ways to proceed: either to take safe, small steps or make risky leaps forward, recognizing that in the latter case one is bound to fail about half of the time. Therefore, a wide variety of sites are available containing them. These YouTube channels select a book, present information about it, provide insights, highlight reviews about it, and summarize its plot. Jim is survived by his beloved wife, lifelong partner and friend Hazel, three of his four sons, Craig, Nicholas, Jonathan (Matthew predeceased him) and one daughter Amy, three daughters-in-law Emma, Catherine and Kasia, fifteen grandchildren, and three great-grandchildren. And, of course, by the rest of us who count him among our dearest friends, and who will miss him very deeply. We offer our deep condolences to his loved ones, and wish him only the very best on his new journey to the great hereafter. MORE FROM QUESTIONS ANSWERED.NET Obituary from the Department of Hydrology & Atmospheric Sciences It is with great sadness that we report the passing away of William James Shuttleworth, Emeritus Regents Professor of Hydrology and Atmospheric Sciences (HAS) at the University of Arizona, who was affectionately called Jim by all those who knew him. Jim passed away Sunday, December 20 at the age of 75. Jim was an incredibly warm, kind and compassionate person, and will be deeply missed. Just before retiring, Jim published *Terrestrial Hydrometeorology*. A widely considered to be the definitive textbook on the subject. I will definitely be adding this to my bookshelf, and I recommend students and faculty of all ranks do the same. Groundwater, May-June es euq. Ground hydrometeorology is the first grade text with sufficient breadth and depth to be used in hydrology departments teach relevant aspects of meteorology, and in weather departments to teach relevant aspects of hydrology, and serve as an introductory text to teach the emerging discipline of hydrometeorology. If that's not enough, some of these book applications and subscription services also provide links to TED videos, reports and chats for books, too. YouTube Channels offering book summaries If you prefer not to read a book summary, there are many YouTube channels that offer online book summaries. Earth hydrometeorology is the first postgraduate level text with sufficient breadth and depth to be used in hydrology departments to teach relevant aspects of meteorology, and in weather departments to teach relevant aspects of hydrology, and to serve as an introductory text to teach the emerging discipline of hydrometeorology. The book will be essential reading for graduate students studying hydrology, meteorology and surface water hydrometeorology. Jim's research focused on how climate change is affected by land surfaces, and was particularly interested in the effects of global climate change caused by deforestation in the Amazon basin and desert formation in Africa. He received many international awards, and in particular he was awarded the International Hydrology Award in 2006. While in UArizona, with its deep interest in terrestrial hydrometeorology, it actively pushed the creation of the hydrometeorology degree program, and then for the fusion of hydrological and atmospheric science programs, which led to the formation of HAS. Before that he had been the head of the Hydrological Process Division of the United Kingdom Institute of Hydrology. If that's not enough, Of these applications of books and subscription services also offer links to vines, reports and ted talks for books, also. For example, they may need a summary of Roberts rules or a simple summary of Macbeth to help them write a I don't know I I'm gonna go I bid.
